PATHXdx · CLIENT GUIDE

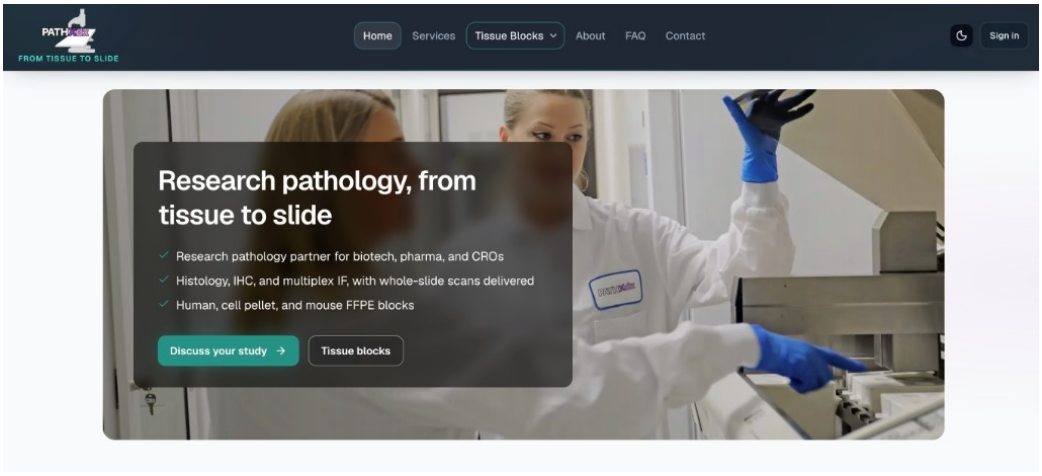

How to view what’s shared with you

Use this short guide to open Project Tracker updates or Shared files that PathX has shared with your email. No password is required — you sign in with a one-time magic link.

You need: the same email address PathX used when they shared access, plus inbox access for that email.

Step 1 — Open pathxdx.com and choose Sign in

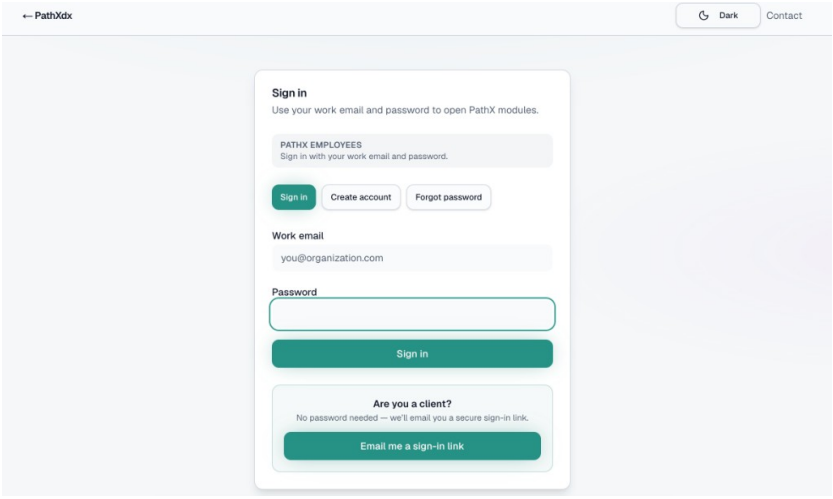

Go to https://pathxdx.com and click Sign in in the top right.

Homepage — Sign in (top right)

Step 2 — Choose the client option

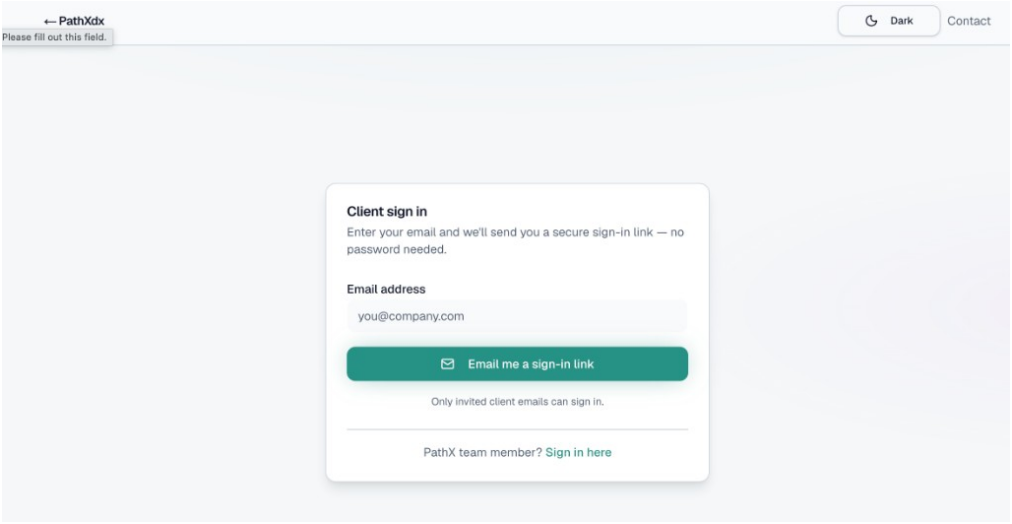

On the Sign in page, skip the employee password form. Under “Are you a client?”, click Email me a sign-in link.

Sign in page — client magic-link option at the bottom

Step 3 — Enter your invited email

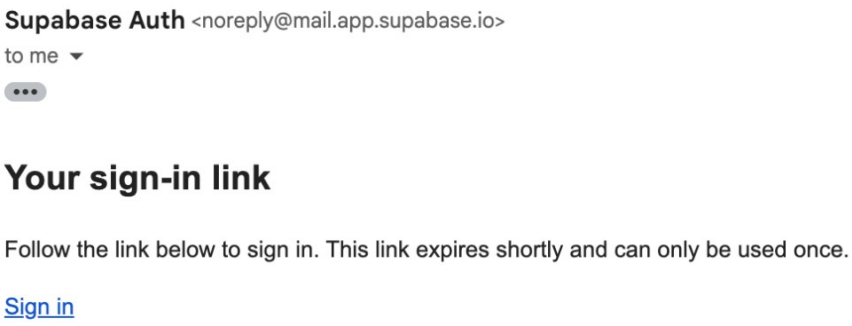

On Client sign in, enter the email PathX invited, then click Email me a sign-in link. Only invited client emails can sign in.

Client sign in — request your magic link

Step 4 — Open the magic link from your email

Check your inbox (and spam) for a message from Supabase Auth with subject about your sign-in link. Click Sign in. The link expires shortly and can be used only once — request a new one if needed.

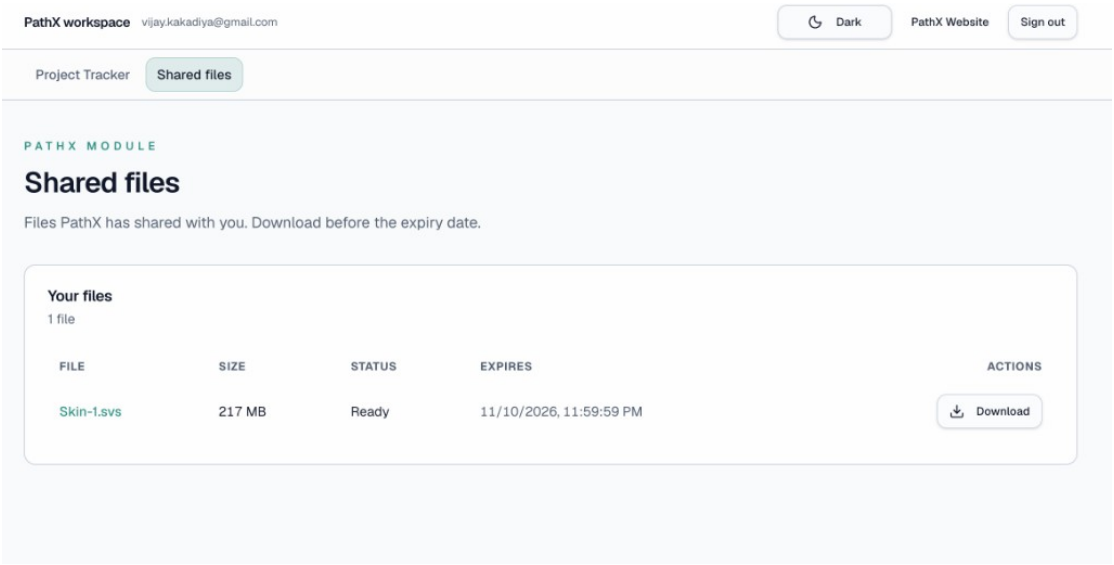

Example magic-link email — click Sign in

Step 5 — Open Shared files or Project Tracker

After you sign in, you'll land in the PathX workspace. Use the tabs at the top:

- Shared files — download files PathX shared with you (download before the expiry date).
- Project Tracker — view study / project progress PathX has shared with your email.

Shared files — download before the expiry date

Tips

- Always use the email PathX shared with — a different address will not see your files or trackers.
- If a magic link has expired, return to Client sign in and request a new one.
- Shared files disappear after their expiry date; download what you need in time.
- Questions? Contact PathX at info@pathxdx.com or via pathxdx.com/contact.
